

Datasheet

8-7050-RC-4

The product 8-7050-RC-4 is a pressure loudspeaker intended for the loud reproduction of speech and siren tones, especially as part of special sound warning devices mounted on special vehicles. Small dimensions and weight allow easy mounting of the speaker behind the mask in the front part of the engine compartment of cars and on the frames of police motorcycles.

SPECIFICATION

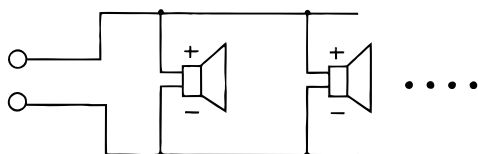

Impedance: 4 Ohm

Compact high output: 50 W

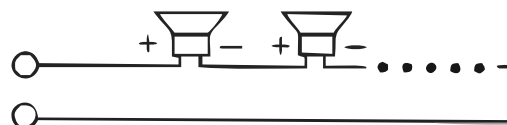

CONNECTION

The loudspeaker may be used with an amplifier whose power and frequency characteristics correspond to the technical parameters of the loudspeaker. Polarity must be observed when connecting multiple speakers. Protect the joints against corrosion.

WHITE wire: **POSITIV**, BLACK wire: **NEGATIV**

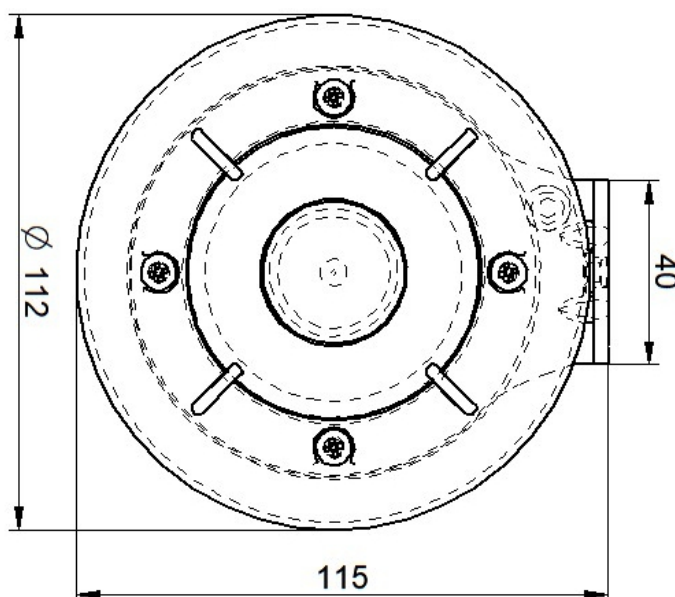

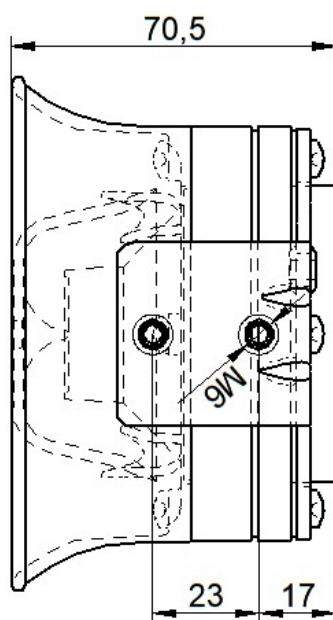

Parallel connection

Serial connection

DIMENSIONS

diameter: 112 mm
depth: 71 mm
weight: 1 kg
